

Public and Stakeholder Relations Lead Vancouver, BC

Based in Vancouver, British Columbia and as a member of the Community team, the Public and Stakeholder Relations Lead implements strategic engagement and consultation activities and plans consistent with Steelhead LNG values and objectives with the public and stakeholders.

The Role

Lead engagement and consultation activities with communities and stakeholders; implement strategic planning initiatives and objectives; organize and participate in site visits, workshops and other activities with stakeholders and represent Steelhead LNG at community events.

Identify, track and monitor identified issues, concerns and interests in communities during the regulatory process; organize and participate in meetings and workshops related to the EA process to discuss issues and concerns identified and potential measures to mitigate concerns; document meetings, interactions, actions and issues and concerns through engagement and consultation activities and track resolutions.

Establish and maintain positive working relationships with communities, stakeholders, consultants, contractors and Steelhead LNG team members; work with Steelhead LNG third party government and communications advisors in the development of communications materials and implementation of communications strategies

Actively represent, uphold and improve Steelhead's values, respect and reputation, while adapting to changing business priorities and needs and participate in other developing areas of the business where appropriate.

The Candidate

As the successful candidate, you are a well-rounded professional with demonstrated competency in the understanding of engagement and consultation context in BC and Canada (knowledge of or relationships with local communities and stakeholders on Vancouver Island is preferred).

You have the demonstrated ability to thrive in a fast paced, dynamic and pressured multi-project business environment, and are capable of identifying and analyzing complex relationship, cultural and other external factors that will impact work process decisions and develop recommendations from such analysis.

Developing strong collaborative working relationships with all levels of individuals is essential, as well as the ability create a robust communication process to manage internal and external parties.

You're excellent listening, verbal and written communication skills combines with a strong initiative, proactive and creative approach to problem solving. You bring experience negotiating agreements and a solid understanding of the Environmental Assessment and regulatory processes.

A willingness and ability to travel in BC is important to the success of this role.

About Steelhead LNG

Steelhead LNG Corp. is a Vancouver-based energy company focused on LNG project development in British Columbia, Canada.

Our team's experience includes guiding some of the world's leading energy companies and projects with commercial and technical expertise that spans the entire LNG value chain. From project concept to product delivery, Steelhead LNG is committed to responsibly creating and delivering value for the communities, suppliers and customers we serve.

Together, the Steelhead team is committed to applying and sharing its global experience and expertise with British Columbians to further develop and grow western Canada's LNG sector. We pride ourselves on doing the right things the right way, striving for simplicity and encouraging creative solutions.

Simply put, we work with outstanding people and treat them outstandingly well, thus our people produce outstanding results.
