

Project Manager, Pipeline Development Vancouver, BC

Based in Vancouver, the Project Manager, Pipeline Development, will lead Steelhead's interest in the technical development and project delivery for pipeline project(s) associated with Steelhead LNG projects on the west coast of British Columbia. The business opportunity is at the pre-Feasibility stage, with LNG sites chosen, the development of terms with the First Nations group who govern the location in place and pre FEED engineering advanced for the LNG facility sites.

The Role

The Project Manager, Pipeline Development will lead Steelhead's interest in the technical development and project delivery for pipeline project(s) associated with Steelhead LNG projects on the west coast of British Columbia.

- Lead the Steelhead development of the pre-FEED and FEED stages of the project, the capital value of which will likely be of the order of US\$5-7 Billion, with the likelihood of taking the project through EPC.
- Lead technical development and project management for Steelhead with pipeline development companies and our strategic upstream partners, working closely with their commercial partner, interacting with other company functional groups, and be capable of leveraging the services of a technical partner (contractor) to deliver
- Develop and deliver a strategy for FEED and EPC stages, and leading the project through these stages to start-up, therefore be capable of leading both early concept stages as well as later work with more detailed scope
- Engage with First Nations, Provincial and Federal government regulatory agencies as a part of the development of the pipeline projects
- Work effectively in a collaborative style with technical partners under contracted agreements

The Candidate

- Seasoned professional with demonstrated competency in major pipeline project development and EPC leadership
- Track record of excellence in team building and leadership but also an ability to work in small highly experienced, senior teams, including complex joint venture arrangements
- Proven ability to integrate the functional contributors to development and delivery of a major project, e.g. LNG Facility Engineering, HSE, Operations and Maintenance, Commercial, Contracting & Procurement, Finance, Construction
- Well practiced in working with Risk Based engineering processes
- Proven ability to lead development of contracting, project development and project execution strategies

About Steelhead LNG

Steelhead LNG Corp. is a Vancouver-based energy company focused on LNG project development in British Columbia, Canada.

Our team's experience includes guiding some of the world's leading energy companies and projects with commercial and technical expertise that spans the entire LNG value chain. From project concept to product delivery, Steelhead LNG is committed to responsibly creating and delivering value for the communities, suppliers and customers we serve.

Together, the Steelhead team is committed to applying and sharing its global experience and expertise with British Columbians to further develop and grow western Canada's LNG sector. We pride ourselves on doing the right things the right way, striving for simplicity and encouraging creative solutions.

Simply put, we work with outstanding people and treat them outstandingly well, thus our people produce outstanding results.

2200 – 1075 West Georgia St.
Vancouver BC, V6E 3C9
